

Yogendra Bisht

Frontend Web Developer | DSA with Java | React.js & Next.js | MCA Candidate
+91 9456311336 | [Email](#) | [LinkedIn](#) | [GitHub](#)

Professional Summary

Detail-oriented MCA candidate with a solid foundation in Computer Science and hands-on experience building scalable, responsive web applications using React.js and Next.js. Skilled in Data Structures & Algorithms using Java and modern front-end technologies including Tailwind CSS, Framer Motion, and Vite. Actively expanding expertise in backend development (Node.js, Express.js), TypeScript, and Machine Learning, with a strong drive to deliver impactful, production-ready software solutions.

Technical Skills

Programming Languages: Java, JavaScript, Python

Web Technologies: HTML5, CSS3, React.js, Next.js, Tailwind CSS, Vite, Framer Motion

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, API Integration

Tools & Platforms: Git, GitHub, Vercel, VS Code, Postman, Google Antigravity

Projects & Experience

Portfolio Website ([live link](#))

Personal Project

Next.js, Tailwind CSS, Vercel

- Engineered a fully responsive personal portfolio from the ground up using Next.js and Tailwind CSS, achieving consistent rendering across all device breakpoints.
- Implemented server-side rendering and static generation to optimize page load performance, reducing time-to-interactive by leveraging Next.js built-in optimizations.
- Deployed the production-ready application on Vercel with CI/CD integration via GitHub, enabling zero-downtime updates on every commit.

Utility Tool Box ([live link](#))

Personal Project

Next.js, React.js, Tailwind CSS, Vercel

- Architected a modular, utility-based web application using Next.js and React.js, structuring reusable components that reduced redundant code by an estimated 40%.
- Designed a clean, intuitive UI with Tailwind CSS, applying responsive design principles to ensure seamless usability across mobile and desktop environments.
- Deployed to Vercel for production use, demonstrating end-to-end ownership from concept and development through continuous delivery.

Student Accommodation Platform ([live link](#))

Full-Stack Project

React.js, Node.js, Express.js, MongoDB

- Designing a full-stack platform to streamline accommodation discovery and management for students near universities, addressing a high-demand real-world problem.
- Planning a RESTful API backend using Node.js and Express.js with MongoDB for scalable data storage, applying newly acquired backend development skills.
- Scoping user authentication, property listing, and search/filter features to deliver a practical, production-grade application that demonstrates full-stack proficiency.

Education

Master of Computer Applications (MCA)

2024 - 2026

Hemwati Nandan Bahuguna Garhwal University

Bachelor of Science (B.Sc) — Physics, Mathematics, Information Technology

2021 - 2024

S.S.J. Campus, Almora

Class XII — 85.2%

2021

Class X — 82.6%

2019
